A MAJOR BIOCLUSTER IN EUROPE

+ 250 members
62 new members
in 2015

BUSINESS AREAS

- New therapeutics
- Diagnostics & Imaging
- Medical Devices
- Digital Health

EUROBIOMED is supported by

EUROBIOMED is the catalyst of Health sector in Southern France.

EUROBIOMED leads territorial initiatives, provides resources and offers solutions for businesses and research organisations. EUROBIOMED helps them innovate, finance, develop and achieve their strategic and business objectives to ultimately improve life through innovations in health.

➔ Founded in 2009 by regional stakeholders, EUROBIOMED tops European rankings in all stages of innovation:

- Education
- Basic research
- Translational and clinical research
- Technological innovation centers
- Start-ups
- Industrial success stories

➔ Together, the 253 EUROBIOMED members including 200 different companies are a driving force in regional development (with **150 R&D projects**, representing **1 billion € of investment** and **680 direct jobs**) and a source of solutions for millions of patients coping with serious conditions such as:

- Cancer
- Chronic inflammatory disease
- Infectious and (re) emerging diseases
- Neurological diseases
- Rare diseases

HELPING BUSINESS AND INNOVATION TO GROW IS WHAT EUROBIOMED IS ALL ABOUT

TERRITORIAL INITIATIVES DRIVING INNOVATION

This unique European immunology cluster is exclusively dedicated to the research and development of the two game changing technologies in cancer and inflammatory diseases treatments: immunotherapy antibodies and cell therapies.

www.marseille-immunopole.org

Euromediag leads the first European world-class diagnostic cluster: an international non-for-profit association located in Brussels and one of the international flagship projects of EUROBIOMED.

It gathers around 450 IVD companies across Europe. EDCA aims at supporting companies in: EU regulation compliance, internationalization, and innovation.
